PROFILE

Results-driven Full Stack Developer with 5+ years of experience building scalable web platforms and AI-powered applications. Strong expertise in Laravel, React.js, and modern JavaScript ecosystems, with recent experience developing AI-driven systems integrating Large Language Models (LLMs), automation workflows, and intelligent decision engines. Experienced in designing automation pipelines, AI-assisted business systems, and data-driven platforms that improve operational efficiency. Skilled at building full-stack architectures that combine backend APIs, automation engines, and AI integrations for modern SaaS and enterprise applications.

WORK EXPERIENCE

Full Stack Developer (AI & Automation)

Action Labs, Bahrain (Onsite)

Sep 2025 – Present

- Designed and developed AI-powered internal systems integrating Large Language Models (LLMs) with business workflows and enterprise applications.
- Built AI-driven decision systems that analyze historical funnel data to determine which strategies previously performed best and recommend optimized actions.
- Implemented human-in-the-loop AI workflows, allowing users to review and approve AI-generated decisions before execution while maintaining detailed decision logs.
- Developed automated systems where approved AI decisions trigger task creation and workflow execution automatically within internal management platforms.
- Built complex n8n automation pipelines integrating multiple APIs, AI services, and business systems to streamline operational processes.
- Developed AI-assisted tools for sales and management teams to analyze performance data and support strategic decision making.
- Built lightweight 3D browser-based mini games using Three.js, creating interactive WebGL experiences for internal and experimental projects.

- Designed backend services in Laravel and modern JavaScript stacks to orchestrate AI responses, automation triggers, and data processing workflows.

Full Stack Developer

Spring ring, Bahrain (Remote)

Nov 2023 – Dec 2024

- Migrated and unified student, teacher, and parent interfaces into a single React.js application, enhancing UI performance and maintainability by 40%.
- Led the development of a secure consolidated messaging platform, collaborating closely with stakeholders in an agile environment to improve communication efficiency.

Full Stack Developer

VII Tech Solutions, Bahrain (Remote)

Aug 2022 – Nov 2023

- Developed high-performance RESTful APIs in Laravel with JWT authentication, integrating Google Maps and Mapbox to enable advanced geolocation capabilities.
- Built dynamic and responsive front-end applications using Vue.js, React.js, and React Native, improving scalability and enhancing user experience by 25%.

Full Stack Developer

Tres Logics, Pakistan (Onsite)

Oct 2021 – Sep 2022

- Designed and optimized secure RESTful APIs in Laravel, reducing server response time by 30%.
- Developed interactive Q&A systems and modern user interfaces with Vue.js and React Native, enhancing user interaction and engagement.

Laravel Developer

Tabz Group International, Pakistan (Onsite)

Oct 2020 – Oct 2021

- Developed an automated ride assignment system using Laravel and Google Maps API, optimizing routing efficiency by 35%.
- Implemented Role-Based Access Control (RBAC) to ensure secure and efficient user authorization.

Full Stack Intern

Code Brisk, Pakistan (Onsite)

Apr 2019 – Sep 2019

- Contributed to a scalable sales and deduction tracking system, ensuring data integrity and optimized performance.

- Built a real-time result generation system and an article publishing platform, gaining practical full-stack development experience.

EDUCATION

- **Bachelor of Science in Computer Science**
University of Sargodha, Sargodha, Pakistan
Apr 2016 – Aug 2020

CERTIFICATIONS

- Scrum Fundamentals Certified — SCRUM study (2025)
- Meta Front-End Developer (Coursera Audit, 2025)

PROJECTS

Selected highlights from 20+ delivered web and mobile applications, including government and enterprise-level platforms.

- **AI Decision Automation Platform**
Developed an AI-powered system that analyzes historical funnel performance data and recommends optimized strategies for sales teams.
- **AI Workflow Automation System**
Implemented business automation pipelines integrating n8n workflows with AI models to automate operational tasks and approval processes.
- **Bahrain.bh & Calendar.bh**
Developed a cultural events and visa booking platform for the Bahrain government, improving citizen scheduling and public service accessibility.
- **PDPFRC & FRC**
Optimized parent–teacher communication modules to improve information flow and user experience within education platforms.
- **SafrCare**
Designed healthcare ride scheduling algorithms with route optimization, improving patient transportation logistics and operational efficiency.

TECHNICAL SKILLS

- **Languages & Frameworks:**

HTML5, CSS, SCSS, Tailwind CSS, Bootstrap, Vuetify, Redux, Vuex, Router, Three.js, WebGL, PHP, Laravel, JavaScript, TypeScript, C++, SQL, Vue.js, React.js, React Native, Next.js, Nuxt.js

- **AI & Automation:**

LLM Integrations, AI Workflow Automation, n8n Automation, AI Decision Systems, AI Agents, Prompt Engineering, AI Data Processing Pipelines, Human-in-the-Loop AI Systems

- **AI & Data Processing:**

AI Model Integrations, Semantic Search, Embeddings, Vector Databases, AI Knowledge Systems, Data Analytics Pipelines

- **API & Integrations:** RESTful APIs, JWT Authentication, Google Maps API, Mapbox, Instagram API, Microsoft SSO, Webhooks

- **Others:**

PHPUnit, Chrome DevTools, Postman, NPM, Composer, Webpack, Babel, Firebase, DigitalOcean, cPanel, Git, GitHub, GitLab, Bitbucket, Cloud Deployment, Miro, Basecamp, Jira, Agile/Scrum, PhpStorm, WebStorm, Visual Studio
