WORK EXPERIENCE

Senior Full Stack developer (AI & Automation), Action Labs Consultants, Manama

Sept 2025 to Present

- Integrated LLMs into internal platforms to automate marketing and operations workflows, reducing manual effort.
- Built AI decision systems that deliver prioritized, actionable recommendations for growth and ops teams.
- Designed human-in-the-loop approval flows to govern AI actions and ensure oversight.
- Implemented audit logging and monitoring for AI pipelines to ensure traceability and compliance.

Full-Stack Developer, Springring

Nov 2023 to Dec 2024

- Migrated student, teacher, and parent interfaces into a unified React application, improving UI performance and maintainability by 40%.
- Led development of a secure, centralized messaging platform with role-based access and end-to-end encryption.
- Collaborated with stakeholders in Agile sprints to prioritize features, implement secure authentication, and streamline communication workflows.
- Delivered a real-time, end-to-end encrypted messaging system that increased communication efficiency and contributed to a 60% improvement in user retention and satisfaction.

Full-Stack Developer, Vil Tach Solutions

Aug 2022 to Nov 2023

- Developed high-performance RESTful APIs with Laravel and JWT authentication; integrated Google Maps API and Mapbox for advanced geolocation and routing features.
- Built responsive frontend applications using Vue.js, React, and React Native, improving usability and user experience by 25% through performance and accessibility enhancements.
- Launched a multi-platform event booking system that attracted 10,000+ users within the first quarter of release.
- Improved front-end performance with lazy loading and component caching, leading to a 40% decrease in mobile bounce rate.

Full-Stack Developer, Tres Logics

Oct 2021 to Sept 2022

- Designed and optimized secure RESTful APIs in Laravel, reducing server response time by 20%.
- Developed interactive Q&A systems and modern user interfaces with Vue and React Native, enhancing user engagement and retention.
- Built a question management module that reduced admin input errors by 70% through validation rules and UX improvements.

Laravel Developer, Tabs Group International

Oct 2020 to Oct 2021

- Developed an automated ride-assignment system using Laravel and Google Maps API, optimizing routing efficiency by 35%.
- Implemented role-based access control (RBAC) to secure user authorization and streamline permissions management.
- Reduced driver wait time by 30% through smart ride-assignment logic and route optimizations.

Full-Stack Intern, Code Brisk

Apr 2019 to Sept 2019

- Contributed to a scalable sales and deduction tracking system, ensuring data integrity and reliability.
- Built a real-time result generation system and an article publishing platform, gaining practical full-stack experience.
- Maintained 90%+ unit test coverage for intern projects to meet company quality standards.

EDUCATION

University of Sargodha, Sargedha, Pakistan

Bachelor of Science in Computer Science, Sept 2016 to Apr 2020

CERTIFICATIONS

freeCodeCamp — Front End Development Libraries Certification

2025

Scrum Fundamentals Certified — SCRUMstudy

2025

Meta Front-End Developer (Coursera Audit)

2025

PROJECTS

AI Decision Automation Platform

Developed an AI-powered system that analyzes historical funnel performance data and recommends optimized strategies for sales teams.

AI Workflow Automation System

Implemented business automation pipelines integrating n8n workflows with AI models to automate operational tasks and approval processes.

brain.bh & Calend

Developed a cultural event and visa backing platform for the Bahrain government, streamlining citizen scheduling and improving public sector engagement.

PDPFRC & FRC

Optimized parent-teacher communication modules to enhance information flow and user experience in education systems

Safrcare

Designed advanced healthcare ride scheduling algorithms with route optimization, improving patient transport logistics and efficiency

Chillup

Built secure, multi-platform event creation and vendor discovery system with integrated multi-tenant authentication

Languages

English (Fluent), Urdu, Punjabi, German (A1 in process)
