PROFILE

Senior Full Stack Developer with 6+ years building SaaS platforms and production AI systems in Laravel, React and TypeScript. I integrate LLMs (GPT-4, Claude), RAG pipelines and n8n automation into real business workflows. Highlights include an AI decision engine that turns sales-funnel data into approved, automated follow-up tasks, and Chillup, an event booking platform that reached 10,000+ users, built for clients across the Gulf, Europe and North America.

SKILLS

AI & LLMs	LLM Integration, OpenAI GPT-4, Claude API, Groq, RAG, AI Agents, Prompt Engineering, pgvector / Embeddings
Automation	Workflow Automation, Firecrawl, n8n, Human-in-the-Loop Workflows
Frontend	JavaScript, TypeScript, React, Next.js, Vue.js, Nuxt.js, HTML5, CSS3, Tailwind CSS, Redux, Three.js, React Native
Backend	PHP, Laravel, Node.js, REST APIs, GraphQL, Webhooks, WebSockets, JWT, OAuth, SSO · *basic:* SOAP, RabbitMQ, Swagger / OpenAPI
Cloud & DevOps	Docker, CI/CD Pipelines, Git / GitHub · *basic:* Kubernetes, AWS, Google Cloud (GCP), DigitalOcean, Laravel Forge
Databases	PostgreSQL, MySQL, MongoDB, Firebase · *basic:* pgBadger
Monitoring & Quality	*basic:* Sentry, OpenTelemetry, SonarQube
Testing & Tools	Unit Testing (PHPUnit, Jest), E2E Testing (Cypress), Postman, Agile / Scrum · *basic:* Lucidchart, incident.io

WORK EXPERIENCE

Senior Full Stack Developer – AI & Automation, Action Labs Consultants (Bahrain)

09/2025 – Present | Onsite, Bahrain until 10/2026 | Remote from Germany since 11/2026

- Integrated GPT-4 and Claude into internal marketing and operations platforms, turning manual review and processing steps into AI-assisted workflows.
- Built an AI decision engine that reviews past sales-funnel performance and recommends the strategies that worked best; once a user approves, it automatically creates the follow-up tasks, and every decision is logged for audit.
- Automated workflows across internal APIs, CRM tools and external data sources with n8n, removing hours of manual work each week.

Full Stack Developer, Springring (Bahrain)

11/2023 – 12/2024 | Remote

- Merged three separate apps (student, teacher, parent) into one React application, so each feature is built once instead of three times.
- Architected an end-to-end encrypted messaging platform where students, teachers and parents communicate in one place, each seeing only what their role allows.
- Built real-time chat and notifications with WebSockets and Laravel Reverb, so messages arrive instantly without page reloads.

Full Stack Developer, VII Tech Solutions (Bahrain)

08/2022 – 11/2023 | Remote

- Launched Chillup, a web and mobile event booking platform that reached 10,000+ users in its first quarter.

- Built Laravel REST APIs with JWT auth and Google Maps / Mapbox routing, including live geolocation for a healthcare transportation app.
- Made mobile pages load faster with lazy loading, caching and smaller bundles, so fewer users left before the page appeared.

Full Stack Developer, **Tres Logics** (Pakistan)
10/2021 – 09/2022 | Onsite

- Improved the database design behind Laravel REST APIs for faster responses.
- Built a question-management module that catches admin input mistakes before questions go live, plus Q&A apps in Vue.js and React Native used by thousands of students.

Laravel Developer, **Tabs Group International** (Pakistan)
10/2020 – 10/2021 | Onsite

- Built automated ride assignment with Laravel and Google Maps that matches rides to nearby drivers and balances workload, reducing driver wait time.

Full Stack Intern, **Code Brisk** (Pakistan)
04/2019 – 09/2019 | Onsite

- Built a real-time results system and an article publishing platform with 90%+ unit test coverage.

KEY PROJECTS

In development — **AI Sales Intelligence Platform**
Firecrawl, PostgreSQL + pgvector, OpenAI Embeddings, Groq, React, Laravel, n8n

- Finds stakeholders, competitors and company data from natural-language queries, using semantic search over millions of scraped records.

Al Salam Bank — **Danat Experience & Project Dream**
Laravel, React

- Gamified campaign platforms for a Bahraini bank (Project Dream with Visa): OTP sign-in, points engine, live leaderboards and prize draws.

Government — **Bahrain.com & Calender.bh**
Laravel, MySQL, Google Maps API

- National event and visa booking platform for the Bahrain Tourism Authority.
