PERSONAL INFORMATION

Current Location: Manama, Bahrain

Work Authorization: Requires visa sponsorship

PROFESSIONAL SUMMARY

Senior Full Stack and AI Automation Engineer with 6+ years building scalable SaaS platforms and production-grade AI systems. Deep expertise in Laravel, React.js, and TypeScript, with hands-on experience integrating LLMs, RAG pipelines, and n8n automation workflows. Proven business impact, including 60% higher user retention, 40% UI performance gains, and 70% fewer admin errors, across Gulf, European, and North American markets.

SKILLS

AI & LLMs: LLM Integration, OpenAI GPT-4, Claude API, Groq, RAG Pipelines, AI Agents, Prompt Engineering, pgvector / Embeddings

Automation: n8n Workflow Automation, Firecrawl, Process Orchestration, Human-in-the-Loop Systems, Audit Pipelines

Frontend: React.js, Next.js, Vue.js, Nuxt.js, TypeScript, Tailwind CSS, Redux, Vuex, Three.js, React Native

Backend: Laravel, PHP, Node.js, RESTful APIs, GraphQL, JWT Auth, Microsoft SSO, WebSockets

Data & DevOps: PostgreSQL, MySQL, MongoDB, Firebase, Docker, CI/CD, Git / GitHub

Testing: Jest, Cypress (E2E), PHPUnit, Agile / Scrum

WORK EXPERIENCE

Senior Full Stack Developer – AI & Automation, Action Labs Consultants

09/2025 – Present

Manama, Bahrain

- Integrated OpenAI GPT-4 and Claude LLMs into internal marketing and operations platforms, automating core workflows and reducing manual processing time by approximately 50%.
- Architected AI decision systems that analyze historical sales funnel data and surface prioritized, actionable growth recommendations for GTM and operations teams.
- Designed human-in-the-loop approval flows governing all AI-triggered actions, ensuring full compliance, auditability, and business oversight.
- Built n8n-powered automation pipelines connecting internal APIs, CRM tools, and external data sources, eliminating hours of weekly manual work.

Full Stack Developer, Springring

11/2023 – 12/2024

Remote (Bahrain)

- Led migration of student, teacher, and parent interfaces into a unified React application, improving UI performance and maintainability by 40%.
- Architected a secure centralized messaging platform with role-based access control and end-to-end encryption, contributing to a 60% improvement in user retention and satisfaction.
- Built real-time messaging features using WebSockets and Laravel Reverb, enabling live notifications and instant cross-role communication.
- Collaborated in Agile sprints to prioritize features, streamline authentication flows, and accelerate release cycles across cross-functional teams.

Full Stack Developer, VII Tech Solutions

08/2022 – 11/2023

Remote (Bahrain)

- Developed high-performance RESTful APIs with Laravel and JWT authentication; integrated Google Maps API and Mapbox for advanced geolocation and routing.
- Built responsive multi-platform UIs in Vue.js, React, and React Native, improving usability by 25% through performance and accessibility enhancements.
- Launched Chillup, a multi-platform event booking system that attracted 10,000+ users within its first quarter of release.
- Reduced mobile bounce rate by 40% through lazy loading, component caching, and front-end bundle size optimization.

Full Stack Developer, Tres Logics

10/2021 – 09/2022

Remote (Bahrain)

- Designed and optimized secure RESTful APIs in Laravel, reducing average server response time by 20%.

- Built a question management module with advanced validation and UX improvements, cutting admin input errors by 70%.
- Developed interactive Q&A systems and modern UIs with Vue.js and React Native, improving user engagement and retention metrics.

Laravel Developer, Tabs Group International

10/2020 – 10/2021

Pakistan

- Built an automated ride-assignment system using Laravel and Google Maps API, optimizing routing efficiency by 35% and reducing driver wait time by 30%.
- Implemented role-based access control (RBAC) securing authorization across multi-role user groups.

Full Stack Intern, Code Brisk

04/2019 – 09/2019

Pakistan

- Built a real-time result generation system and article publishing platform; maintained 90%+ unit test coverage across all projects.

KEY PROJECTS

AI Sales Intelligence Platform (In Development)

Stack: Firecrawl, PostgreSQL + pgvector, OpenAI Embeddings, Groq, React.js, Laravel, n8n, TypeScript

End-to-end AI-powered B2B sales intelligence tool enabling salespeople to find global stakeholders, competitors, and company data in seconds through natural language queries.

- Firecrawl-based scraping engine extracting structured company and people data at scale from across the public web.
- PostgreSQL + pgvector database layer storing and indexing OpenAI embeddings for fast semantic similarity search across millions of records, with Groq-accelerated inference for stakeholder identification and entity classification.
- React and Laravel frontend and backend with real-time streaming results and an OpenAI-powered natural language prompt interface for conversational data queries.
- n8n orchestration layer automating the full scrape, embed, classify, and surface pipeline on scheduled and on-demand triggers.

AI Decision Automation Platform (Action Labs)

Stack: OpenAI GPT-4, Claude API, Laravel, React, n8n

- LLM-powered system ingesting historical sales funnel performance data to generate optimized strategy recommendations, reducing manual analysis time by 60%.
- Delivered prioritized, actionable growth recommendations to sales and operations teams via a real-time dashboard.

bahrain.com & calender.com – Bahrain Government

Stack: Laravel, Blade, MySQL, Google Maps API

- National-scale cultural event and visa booking platform for the Bahrain Tourism Authority, streamlining citizen scheduling and improving public sector digital engagement.

Safrcare – Healthcare Ride Scheduling

Stack: Laravel, React Native, Google Maps API, MySQL

- Advanced route optimization algorithms for patient transport logistics, improving scheduling efficiency and on-time performance across a healthcare fleet.

Springing – Secure EdTech Messaging Platform

Stack: React, Laravel Reverb, WebSockets, Redux, JWT

- Real-time, end-to-end encrypted messaging system for a school platform serving students, teachers, and parents, achieving a 60% improvement in communication efficiency.

EDUCATION

Bachelor of Science in Computer Science

09/2016 – 07/2020

University of Sargodha, Pakistan

CERTIFICATIONS

- Meta Front-End Developer – Coursera, 2025
- Front End Development Libraries – freeCodeCamp, 2025
- Scrum Fundamentals Certified – SCRUMstudy, 2025
